SUMMARY

Full Stack Developer with 4+ years of experience, specializing in frontend engineering with React.js and Next.js. Proven track record of building responsive, high-performance, SEO-optimized web applications while collaborating across the stack with NestJS, .NET Core, and PostgreSQL. Experienced in developing scalable UI architectures, integrating REST APIs, and delivering production-ready solutions for enterprise and customer-facing products.

SKILLS

- **Frontend:** React.js, Next.js, Redux, TypeScript, JavaScript, Tailwind, Ant Design, Shadcn
- **Backend:** Node.js, Nest.js, PostgreSQL, Swagger, JWT, Prisma
- **Tools & Frameworks:** Visual Studio, SSMS, xUnit, Moq, VS Code, Postman, pgAdmin
- **Soft Skills:** Leadership, Time Management, Problem Solving, Communication, Adaptability

WORK EXPERIENCE

Software Engineer, CodeFulcrum

Aug 2025 - Present

- Built and shipped production full-stack features across React/Next.js and NestJS, owning delivery from UI implementation to API integration and deployment support.
- Designed REST APIs with PostgreSQL using modular NestJS, request validation, and JWT authentication for secure, maintainable backend services.
- Architected SEO-first Server Component pages with route-specific metadata, JSON-LD, dynamic sitemaps, and a data-driven content layer for scalable page creation.
- Delivered a production IT services website with nine service pages, a careers funnel, and a secure contact pipeline with bot protection, SMTP delivery, and analytics tracking.

Software Engineer, Cloudpacer

Jul 2023 - Aug 2025

- Developed a scalable eCommerce platform with Next.js, supporting multiple vendors and an admin panel for efficient management.
- Integrated Stripe, Apple Pay, and Google Pay for secure, seamless payment processing, improving checkout experience in React.
- Implemented SEO strategies, meta tags, to enhance visibility and search engine ranking.
- Optimized platform performance, integrated Google Maps, and enabled flexible checkout options for improved user experience.

Associate Software Engineer, ILI Digital

Jul 2022 - Jul 2023

- Developed and maintained scalable microservices with .NET Core 5.0 and 2.2, ensuring high scalability, maintainability, and resilience.
 - Optimized data access with Entity Framework Core and raw SQL, enhancing database performance on SQL Server.
 - Implemented API rate limiting, improving system security, traffic management, and reliability.
 - Conducted thorough testing using xUnit and Moq to ensure microservices functionality and performance.
-

PROJECTS

Enterprise Administration Platform

- Led frontend development of a multi-tenant admin platform with role-based dashboards, protected routing, and shared workflows for four user personas.
- Built a scalable React architecture with RTK Query, centralized auth, reusable tables/forms, and standardized CRUD patterns.
- Delivered access management, drill-down reporting, and a learning management module with rich content authoring and lazy-loaded routes.

Real Estate Marketplace Platform

- Led frontend development of a production real estate marketplace with SEO-first public pages and role-based dashboards for brokers, owners, and administrators.
- Built server-rendered property listings with dynamic SEO metadata, JSON-LD, ISR, and dynamic sitemaps to improve search visibility and performance.
- Developed secure role-based workflows with Firebase authentication, JWT authorization, multi-step listing creation, moderation tools, and map-based property discovery.

E-commerce Platform Development

- Built a responsive, SEO-optimized Next.js frontend with server-side rendering, delivering fast load times and a mobile-first user experience.
- Integrated Stripe, Google Pay, and Apple Pay to deliver secure, seamless payment workflows across the application.
- Implemented Google Maps location services and a customer rewards system, enabling real-time geolocation and points-based user engagement.

Real-Time Fleet Management Dashboard

- Built an interactive React.js dashboard with Mapbox to visualize real-time fleet locations, shipment routes, and geofencing alerts.
- Integrated live APIs to power dashboards with dynamic charts, data tables, and operational analytics for loads and driver performance.
- Developed drag-and-drop Kanban workflows and real-time notifications for load management, shipment milestones, and route deviations.

Employee Management System

- Developed RESTful APIs with .NET Core, Entity Framework, and SQL Server for employee, attendance, leave, and payroll management.
- Implemented JWT-based authentication and role-based authorization to secure HR, manager, and employee workflows.
- Built a React.js admin interface with dynamic tables, interactive forms, and real-time status updates for employee management and approvals.

EDUCATION

Sep 2018 - Jul 2022

Bachelor of Science in Computer Science

Punjab University College of Information Technology (PUCIT) — Lahore, Pakistan

- Relevant Coursework: Data Structures, Algorithms, Web Development, Database Management, Software Engineering.
